Work history

UX/UI Designer

MPIRIQ

01/2026 - Current

Design clean, user-centered interfaces for MPIRIQs web and dashboard applications; translate research workflows and user needs into elegant, functional product designs, collaborate closely with product, frontend, and data teams to bring ideas to life; build and maintain a design system in Figma, ensuring consistency across all touchpoints; conduct usability tests and iterate based on feedback; keep user empathy at the heart of every design decision

UX/UI Designer

Inria

06/2021 - 06/2025

Lead in a 4 people team on the design and implementation of the Vera C. Rubin Observatory monitoring and operating software - LOVE, collaborating closely with end users and experts worldwide. Contributed to various other science projects providing UX expertise, ensuring intuitive and user-first experiences.

Designer

GOB+DI

03/2020 - 04/2021

Conceptualizing and designing a series of impactful experiences for users, collaborating closely with a diverse team to implement new data governance policies. This effort involved effective communication and coordination with team members across different disciplines, I was able to demonstrate the importance of user-centric design and successfully translated complex data.
