

KINEA

*A multi-bn USD inefficiency in pharma.
One infrastructure to fix it.*

Connecting clinical research with day2day care.

The research paradox:
**Looking where
the patients aren't**

Result

80% of trials miss enrollment targets.
Delays cost **\$600k - \$1.4M per day** in a \$100B trials market.

KINEA fixes this mismatch
democratizing clinical trial access

Connecting day2day care with clinical research through
**AI, unified infrastructure,
and services**

Faster research, lower costs.

Pharma

KINEA

**AI driven data structuring.
Offering data & patient access.
At unseen speed and volume.
Holding the contracts.**

Economic and scientific participation tailored to
existing capabilities. As data sites or trial sites.

**Clinical
Network**

An experienced team to master all dimensions

PD Dr. med. Name Name
Co-Founder & Medical Advisor
+20 yrs of day2day care in oncology, Owner study center

Dr. Name Name
Co-Founder & CTO
PhD Quantum Physics, AI, engineering & data science

Name Name
Co-Founder & CEO
Built & scaled large platform businesses in highly regulated environments

PD Dr. med. Name Name
Chief Medical Officer
+10 yrs Pharma, lead global R&D projects

Covering the stack **from data to customer**

01 Data

1st party data sources, practices, clinics

02 Engine

Extraction, harmonization, and aggregation of raw data

03 SaaS

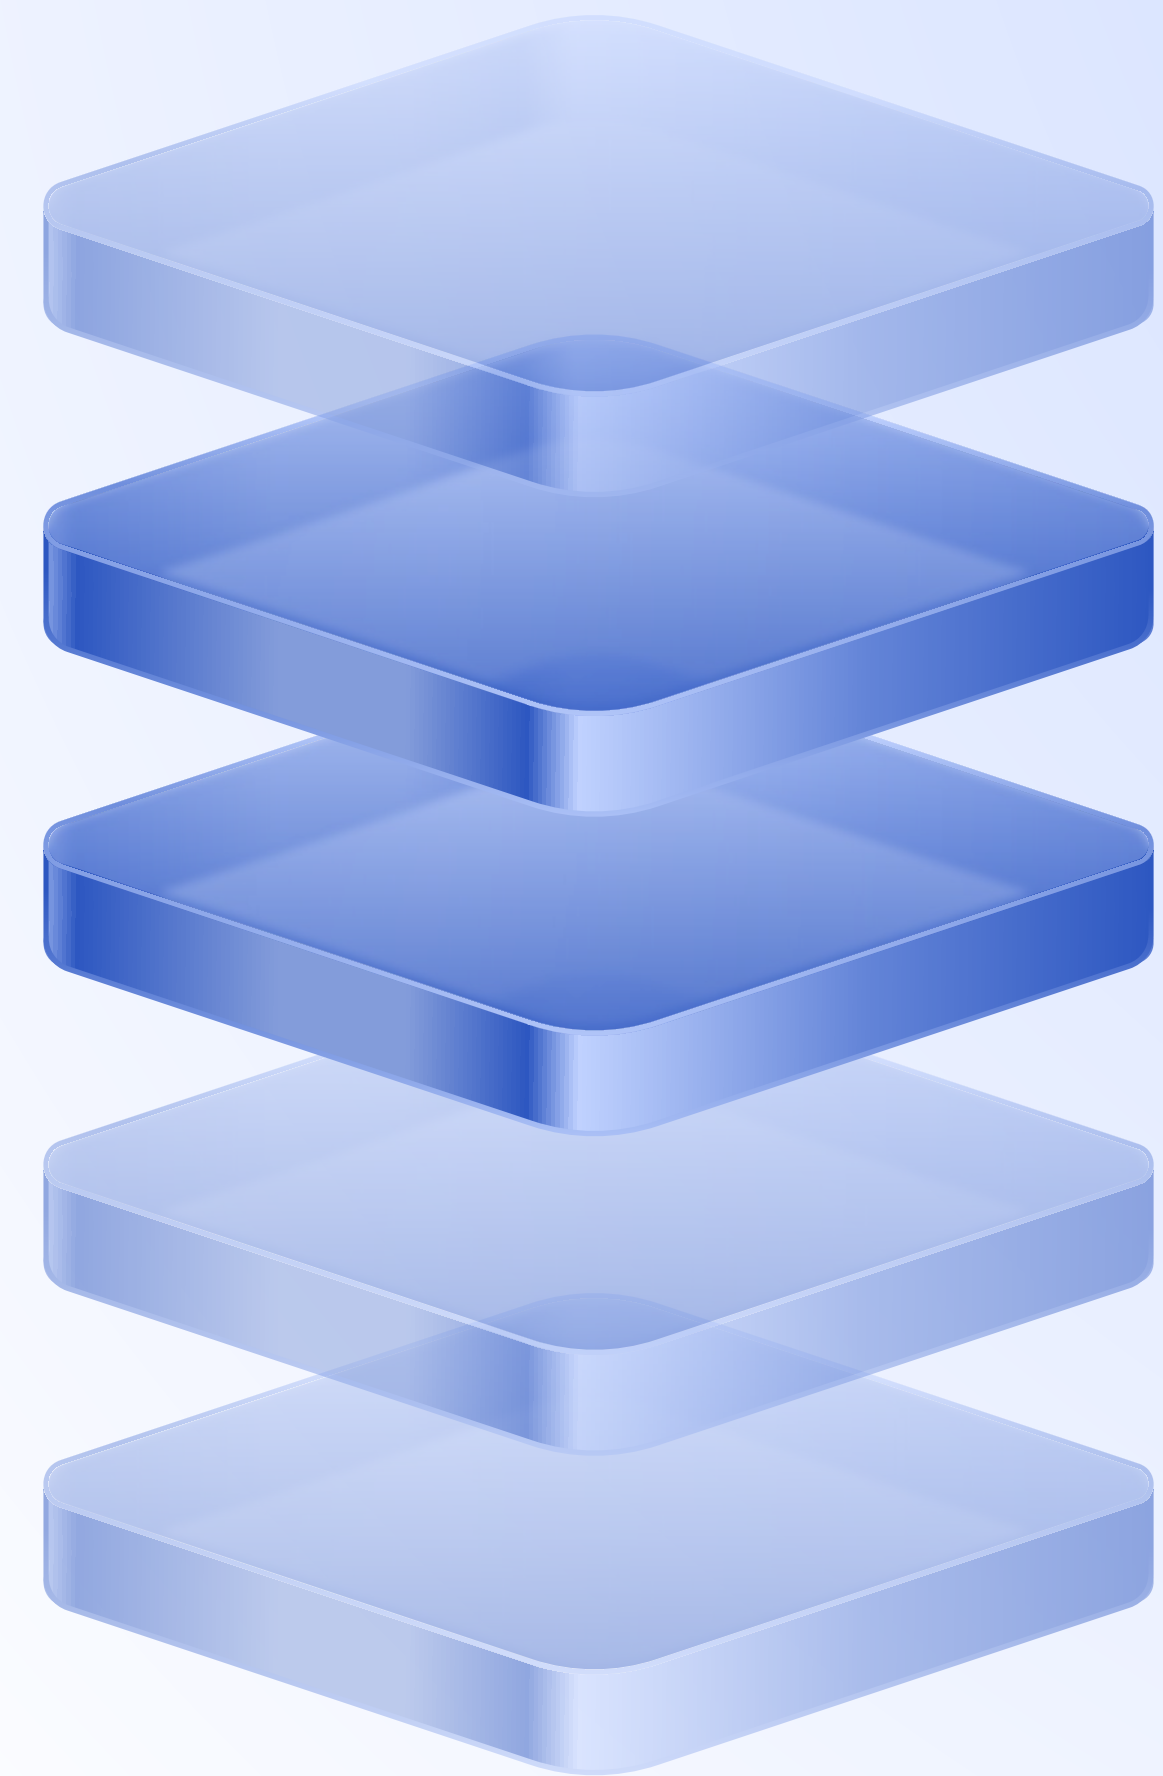

Monitoring, benchmarking, analytics of studies and treatments

04 Clin. Research

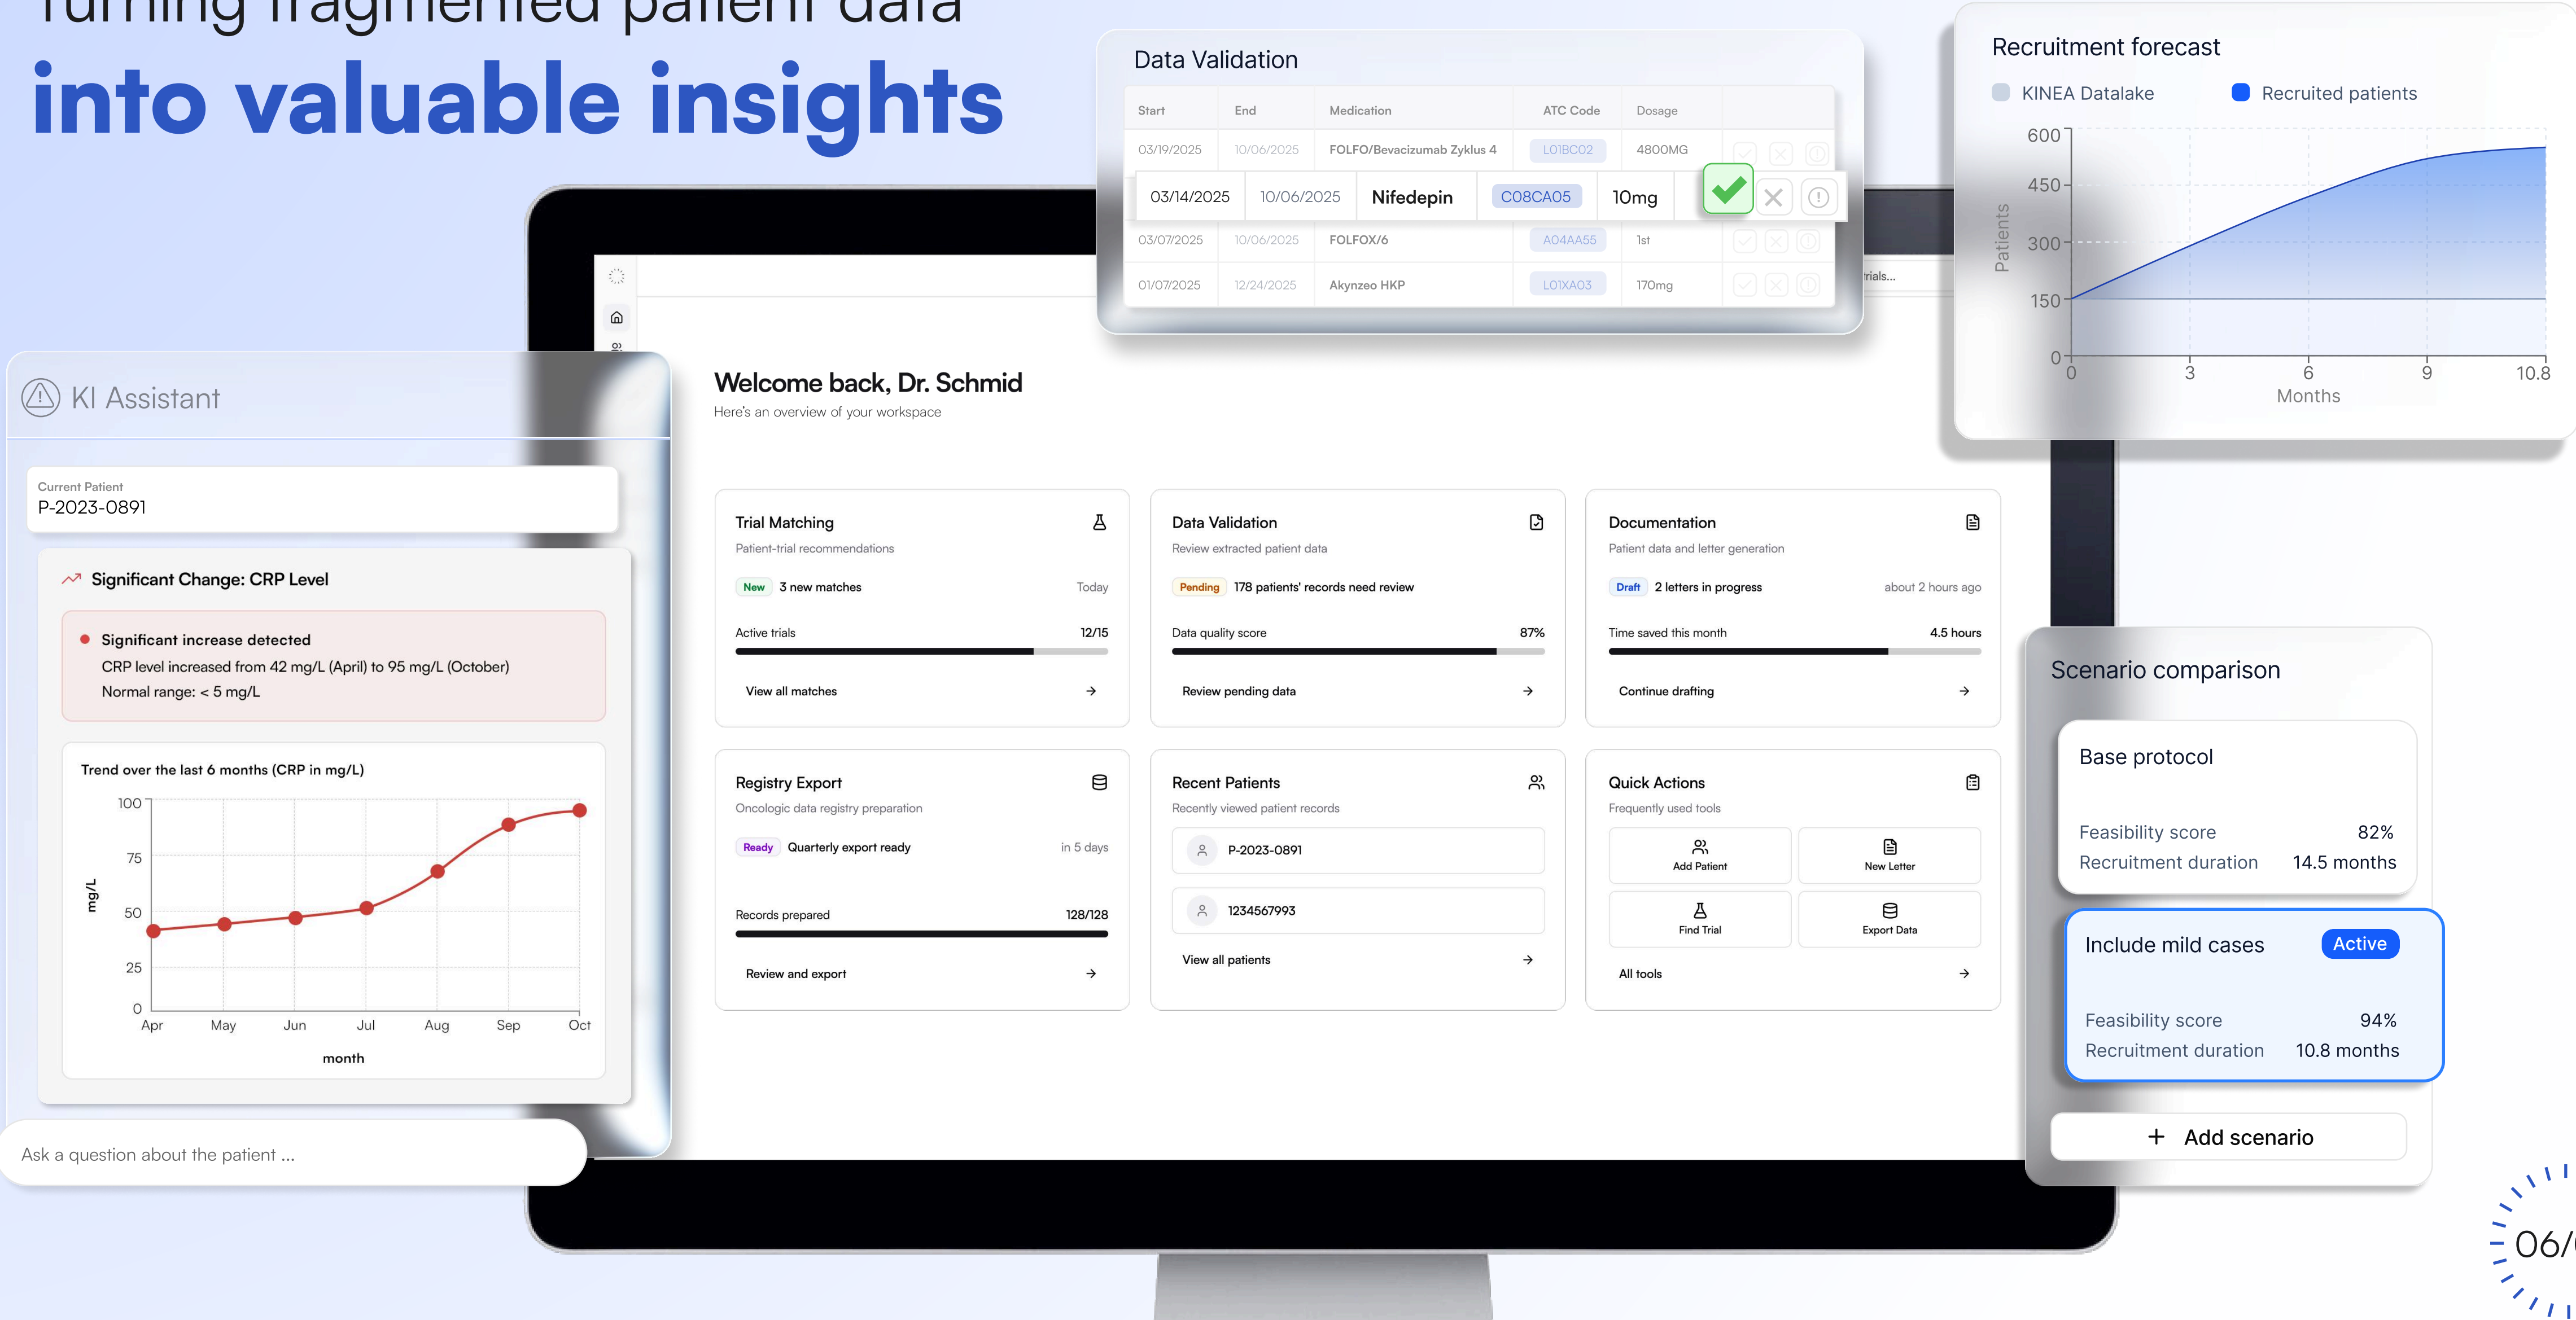

Planning, recruitment, and conduction of clin. trials, RWE

05 Customer

Every Sponsor and CRO

Turning fragmented patient data
into valuable insights

Becoming the operating system for AI-driven clinical research
